Web Development Projects

Meet-Up

- Developed an app utilizing a Test Driven Development approach
- Implemented features such as offline support, push notifications, and "add to home screen" prompt
- Utilized data visualization techniques to display event data in the form of charts and graphs
- Incorporated serverless functions hosted by a cloud provider for efficient scaling
- Improved user experience and performance through implementation of Progressive Web App features

NixFlix

- Built server-side component of a "movies" web application (NixFlix)
- Implemented features such as user sign up, updating personal information, and creating a list of favorite movies
- Utilized REST API and database to provide users with access to information about different movies, directors, and genres
- Developed the client-side using React, based on existing server-side code
- Utilized Bootstrap framework to create responsive design for application.

Professional Experience

Solutions Specialist

Verizon Wireless | 2016 - 2022

- Successfully implemented solutions for a wide array of cellular customers, creating personal connections to make tech look simple
- Performed troubleshooting on iOS, android, Bluetooth and Wi-Fi electronics, as well as Verizon software and submitted service tickets
- Provided training for new employees through hands-on experience and promoting a culture of continuous improvement

Assistant Sales Manager

Mark's Mattress Outlet | 2015 - 2016

- Implemented new sales tactics and processes in or to generate maximum amount of sales to potential buyers
- Utilized Point of Sales, QuickBooks, and Microsoft Office applications.
- Worked independently while selling, pricing, ordering new inventory
- Collaborated with other managers to coordinate sales and product transfers across other Mark's locations

Inventory Specialist

Walmart | 2014 - 2015

- Worked in a fast-paced environment and met organization standards and deadlines for stock replenishment
